1	PART C	E THIS DISCLO	SURE	

THE INFORMATION DISCLOSED IS GIVEN TO THE BEST OF SELLER'S KNOWLEDGE.

- NOTICE: This Disclosure Statement satisfies the disclosure requirements of MN Statutes 513.52 through 513.60.
 Under Minnesota law, sellers of residential property, with limited exceptions listed on page nine (9), are obligated to disclose to prospective buyers all material facts of which Seller is aware that could adversely and significantly affect an ordinary buyer's use or enjoyment of the property or any intended use of the property of which Seller is aware.
 MN Statute 513.58 requires Seller to notify buyer in writing as soon as reasonably possible, but in any event before closing, if Seller learns that Seller's disclosure was inaccurate. Seller is obligated to continue to notify Buyer, in writing,
- 12. of any facts disclosed here (new or changed) of which Seller is aware that could adversely and significantly affect the
- 13. Buyer's use or enjoyment of the property or any intended use of the property that occur up to the time of closing.
- 14. Seller has disclosure alternatives allowed by MN Statutes. See *Disclosure Statement: Seller's Disclosure Alternatives*
- 15. form for further information regarding disclosure alternatives. **This disclosure is not a warranty or a guarantee of any**
- 16. kind by Seller or licensee(s) representing or assisting any party in the transaction and is not a substitute for any inspections or warranties the party(ies) may wish to obtain.
- 18. For purposes of the seller disclosure requirements of MN Statutes 513.52 through 513.60:
- 19. "Residential real property" or "residential real estate" means property occupied as, or intended to be occupied as, a
- 20. single-family residence, including a unit in a common interest community as defined in MN Statute 515B.1-103,
- 21. clause (10), regardless of whether the unit is in a common interest community not subject to chapter 515B.
- 22. The seller disclosure requirements of MN Statutes 513.52 through 513.60 apply to the transfer of any interest in
- 23. residential real estate, whether by sale, exchange, deed, contract for deed, lease with an option to purchase, or any
- 24. other option.
- 25. INSTRUCTIONS TO BUYER: Buyers are encouraged to thoroughly inspect the property personally or have it
- 26. inspected by a third party, and to inquire about any specific areas of concern. **NOTE:** If Seller answers "NO" to any of
- 27. the questions listed below, it does not necessarily mean that it does not exist on the property, did not occur, or does
- 28. not apply. "NO" may mean that Seller is unaware.
- 29. INSTRUCTIONS TO SELLER: (1) Complete this form yourself. (2) Consult prior disclosure statement(s) and/or
- 30. inspection report(s) when completing this form. (3) Describe conditions affecting the property to the best of your
- 31. knowledge. (4) Attach additional pages, with your signature, if additional space is required. (5) Answer all questions.
- 32. (6) If any items do not apply, write "NA" (not applicable).

- (A) There is no duty to disclose the fact that the Property
 - (1) is or was occupied by an owner or occupant who is or was suspected to be infected with Human Immunodeficiency Virus or diagnosed with Acquired Immunodeficiency Syndrome;
 - (2) was the site of a suicide, accidental death, natural death, or perceived paranormal activity; or
 - (3) is located in a neighborhood containing any adult family home, community-based residential facility, or nursing home.
- (B) **Predatory Offenders.** There is no duty to disclose information regarding an offender who is required to register under MN Statute 243.166 or about whom notification is made under that section, if Seller, in a timely manner, provides a written notice that information about the predatory offender registry and persons registered with the registry may be obtained by contacting the local law enforcement agency where the property is located or the Department of Corrections.
- (C) The provisions in paragraphs (A) and (B) do not create a duty to disclose any facts described in paragraphs (A) and (B) for property that is not residential property.

400. (D) Inspections.

- (1) Except as provided in paragraph (2), Seller is not required to disclose information relating to the real Property if a written report that discloses the information has been prepared by a qualified third party and provided to the prospective buyer. For purposes of this paragraph, "qualified third party" means a federal, state, or local governmental agency, or any person whom Seller or prospective buyer reasonably believes has the expertise necessary to meet the industry standards of practice for the type of inspection or investigation that has been conducted by the third party in order to prepare the written report.
- (2) Seller shall disclose to the prospective buyer material facts known by Seller that contradict any information included in a written report under paragraph (1) if a copy of the report is provided to Seller.

Radon in Real Estate Transactions

All Minnesota homes can have dangerous levels of radon gas. Radon is a colorless, odorless and tasteless radioactive gas that can seep into homes from the soil. When inhaled, its radioactive particles can damage the lungs. Long-term exposure to radon can lead to lung cancer. About 21,000 lung cancer deaths each year in the United States are caused by radon.

The only way to know how much radon gas has entered the home is to conduct a radon test. MDH estimates 2 in 5 homes exceed the 4.0 pCi/L (picocuries per liter) action level. Whether a home is old or new, any home can have high levels of radon.

The purpose of this publication is to educate and inform potential home buyers of the risks of radon exposure, and how to test for and reduce radon as part of real estate transactions.

Disclosure Requirements

Effective January 1, 2014, the Minnesota Radon Awareness Act requires specific disclosure and education be provided to potential home buyers during residential real estate transactions in Minnesota.

Before signing a purchase agreement to sell or transfer residential real property, the seller shall provide this publication and shall disclose in writing to the buyer:

- whether a radon test or tests have occurred on the property
- the most current records and reports pertaining to radon concentrations within the dwelling
- a description of any radon levels, mitigation, or remediation
- information on the radon mitigation system, if a system was installed
- 5. a radon warning statement

Radon Facts

How dangerous is radon? Radon is the number one cause of lung cancer in non-smokers, and the second leading cause overall. Your risk for lung cancer increases with higher levels of radon, prolonged exposure, and whether or not you are a current smoker or former smoker.

Where is your greatest exposure to radon? For most Minnesotans, your greatest exposure is at home where radon can concentrate indoors.

What is the recommended action based on my results? If the average radon in the home is at or above 4.0 pCi/L, the home's radon level should be reduced. Also, consider mitigating if radon levels are between 2.0 pCi/L and 3.9 pCi/L. Any amount of radon, even below the recommended action level, carries some risk.

Radon Warning Statement

"The Minnesota Department of Health strongly recommends that ALL homebuyers have an indoor radontest performed prior to purchase or taking occupancy, and recommends having the radon levels mitigated if elevated radon concentrations are found. Elevated radon concentrations can easily be reduced by a qualified, certified, or licensed, if applicable, radon mitigator.

Every buyer of any interest in residential real property is notified that the property may present exposure to dangerous levels of indoor radon gas that may place the occupants at risk of developing radon-induced lung cancer. Radon, a Class A human carcinogen, is the leading cause of lung cancer in nonsmokers and the second leading cause overall. The seller of any interest in residential real property is required to provide the buyer with any information on radon test results of the dwelling"

Radon Testing

Any test lasting less than three months requires **closed-house conditions**. This means keep all windows and doors closed, except for normal entry and exit.

Before testing: Begin closed-house conditions at least 12 hours before the start of the radon test.

During testing: Maintain closed-house conditions during the entire duration of the short-term test. Operate home heating or cooling systems normally during the test.

Where should the test be conducted? Any radon test conducted for a real estate transaction needs to be placed in the lowest livable area of the home suitable for occupancy. This is typically in the basement, whether finished or unfinished.

Place the test kit:

- 20 inches to 6 feet above the floor
- 3 feet from exterior doors and windows
- 1 foot from exterior walls

- 4 inches away from other objects
- o in a location where it won't be disturbed
- not in enclosed areas or areas of high heat/humidity

How are radon tests conducted in real estate transactions?

There are special protocols for radon testing in real estate transactions. Here are the two most common.

Continuous Radon Monitor (CRM)

This test is completed by a certified radon measurement professional with a calibrated CRM for a minimum of 48 hours. The data is analyzed to ensure a valid test. A report is generated by the measurement professional.

Simultaneous Short-Term Testing

Two short-term test kits are used at the same time, placed 4 inches apart, for a minimum of 48 hours. Test kits are sent to the lab for analysis. The lab generates a report. The two test results are averaged to get the radon level.

All radon tests should be conducted by a licensed professional. This ensures the test was conducted properly, in the correct location(s), which includes testing the lowest liveable level in each unique foundation type and undre appropriate building conditions. A list of these licensed radon measurement professionals can be found at MDH's Radon web site.

Radon Mitigation

When elevated levels of radon are found, they can be easily reduced by a licensed professional. A list of these licensed radon mitigation professionals can be found on MDH's Radon website.

Radon mitigation is the process or system used to reduce radon concentrations in the breathing zones of occupied buildings. The goal of a radon mitigation system is to reduce the indoor radon levels to below the action level. This is done by drawing soil gas from under the house and venting it above the roof. A quality mitigation system is often able to reduce the annual average radon level to below 2.0 pCi/L. The cost of a radon mitigation system averages \$1,200 to \$2,500.

After a radon mitigation system is installed perform an independent short-term test to ensure the reduction system is effective. Operate the radon system during the entire test. This short-term test will confirm low levels in the home. Be sure to retest the house every two years to confirm continued radon reduction.
