120. **M. OTHER INFORMATION:**

121. **WATER INTRUSION AND MOLD GROWTH:** Recent studies have shown that various forms of water intrusion
122. affect many homes. Water intrusion may occur from exterior moisture entering the home and/or interior moisture
123. leaving the home.

124. Examples of exterior moisture sources may be

- 125. • improper flashing around windows and doors,
- 126. • improper grading,
- 127. • flooding,
- 128. • roof leaks.

129. Examples of interior moisture sources may be

- 130. • plumbing leaks,
- 131. • condensation (caused by indoor humidity that is too high or surfaces that are too cold),
- 132. • overflow from tubs, sinks or toilets,
- 133. • firewood stored indoors,
- 134. • humidifier use,
- 135. • inadequate venting of kitchen and bath humidity,
- 136. • improper venting of clothes dryer exhaust outdoors (including electrical dryers),
- 137. • line-drying laundry indoors,
- 138. • houseplants—watering them can generate large amounts of moisture.

139. In addition to the possible structural damage water intrusion may do to the property, water intrusion may also result
140. in the growth of mold, mildew and other fungi. Mold growth may also cause structural damage to the property.
141. Therefore, it is very important to detect and remediate water intrusion problems.

142. Fungi are present everywhere in our environment, both indoors and outdoors. Many molds are beneficial to humans.
143. However, molds have the ability to produce mycotoxins that may have a potential to cause serious health problems,
144. particularly in some immunocompromised individuals and people who have asthma or allergies to mold.

145. To complicate matters, mold growth is often difficult to detect, as it frequently grows within the wall structure. If you
146. have a concern about water intrusion or the resulting mold/mildew/fungi growth, you may want to consider having
147. the property inspected for moisture problems before entering into a purchase agreement or as a condition of your
148. purchase agreement. Such an analysis is particularly advisable if you observe staining or any musty odors on the
149. property.

150. For additional information about water intrusion, indoor air quality, moisture or mold issues, go to the Minnesota
151. Association of REALTORS® web site at www.mnrealtor.com.

EXHIBIT A

4509 Clinton Ave S Minneapolis, MN 55419

1. Seller has not lived in the property and purchased it for the sole purpose of remodeling it to sell. All necessary permits were pulled and closed out for the work that was performed. The buyer has right to an inspection to satisfy themselves as to the property condition.
2. Some parts of the home are new and some are remodeled. There are imperfect surfaces on trim and walls. The bathroom floor and tub were resurfaced by Miracle Method and any paperwork will be passed on to the buyers. The seller just wants the buyer to be made aware.
3. Seller will need to paint the outside foundation block of the home. Cold weather hit soon after closing and that was not completed. Also, the yard has some missing grass where a tree was removed and where the dumpster was. The seller agrees to come back as weather permits and seed the lawn for grass one time. Buyer is purchasing this property with the understanding that the yard is not fully grown with grass. The back part of the fence will also be put into the ground once the ground thaw permits.
